Partnership in the project **THAW**: *“Trends and Hazards in Arctic Warming: Climate change and greenhouse gas emissions from Arctic permafrost regions”*

Thank you for the invitation to participate as a partner in the proposed project **THAW**, coordinated by Norwegian Institute for Air Research. I accept this invitation and I am looking forward to an interesting collaboration.

We are happy to contribute, if available, our flask air samples collected regularly every week at the Alert WMO/GAW station in the Canadian Arctic for methane isotopic analysis at Royal Holloway, University of London (Dr. Rebecca Fisher, Prof. Euan Nisbet).

In this sense, we confirm that we will participate as a partner in the THAW project without being a contractor.

Best regards,

Ingeborg Levin
